technetix

DBx platform

t-box v1.22.25

Software release notes

Contents

1   Introduction

Technetix is pleased to announce that the latest 1.22.25 version of the t-box software, for controlling our DBx modular amplifier platform, DBC-1200Lite and newly added DBT-1200-Cx amplifiers, is now available for download from our website **technetix.com**

IMPORTANT: Please make sure you upgrade to 1.22.14 before upgrading to this version. This is required, not optional. Please make sure you shutdown and restart the t-box after applying each of these upgrades.

---

2   Product definition

2.1 Resolved bugs

- Created a default name for backups when no name is configured for amplifier
- Very specific DBE amplifers now also support the fourth downstream RF module
- Upgrade file naming restrictions are relaxed
- Upstream controls are no longer disabled when AGC/ASLC is active

2.2 New features

- Added support for DBT-1200-C1 and DBT-1200-C3 amplifiers
- Added DBT-1200-C1 and DBT-1200-C3 in offline amplifier configurations
- Added support for DBRC-RPD-2 module
- Export multiple backups at once in a zip archive
- Alerting banner when AGC/ASLC is set but not active

2.3 Supported devices

This version of t-box supports:
- DBC-1200Lite
- DBC-1200
- DBC-1200S
- DBC-1200Sv2
- DBD-1200
- DBD-1200v2
- DBE-1200v2
- DBE-1200S
- DBE-1200Sv2
- DBT-1200-C1
- DBT-1200-C3

2.4 Known bugs

- 204/258 and 85/102 are the only diplexers that are currently supported on DBT-1200 amplifiers

2.5 Release history

Version	Release date	Notes
1.22.25	23/12/2022	Support for DBT-1200-C1/3
1.22.14	15/07/2022	Support DBC and DBD Node, DBUS-C-2, calculations corrected
1.1	21/06/2021	Improved amplifier support and added optical modules
1.03	12/06/2020	DBDCM-A1 FSK support
1.0	15/07/2017	Initial release
